

Florent TOUZET

Security Systems and Networks Engineer

📍 16000 Angoulême, France ✉ contact@ftouzet.com 🌐 www.ftouzet.com 🔗 linkedin.com/in/touzetf

About Me

A Security Systems and Networks Engineer passionate about cybersecurity, with over five years of experience and a comprehensive and varied technical background from technical support to the administration of complex systems in IT environments of various sizes. Today, I am responsible for the **administration** and **security** of virtualized infrastructures (VMware, Proxmox), the network (Cisco, Aruba, Stormshield), and storage/backup (Veeam), while integrating monitoring, code management, and containerization tools (Zabbix, GitLab, Ansible, Docker, etc.) . As an OSCP+ and eJPTv2 certified professional, I complement my operational skills with **offensive security** expertise.

Experience

🚩 Systems and Networks Engineer (Fortil Consultant) – Naval Group

2023 - Present | Angoulême, France

Administering and securing the infrastructure for a sensitive development network, with over 600 virtual machines. Hybrid Windows/Linux environment: Active Directory, virtualization (VMware, Proxmox, Docker), monitoring (Zabbix), SIEM (Graylog, Trellix), networking (Cisco, Stormshield), and automation (Bash, PowerShell).

🌐 Consultant – Fortil

2023 - Present | Bordeaux, France

Employed by Fortil and working as a consultant on-site at the client's location.

🔗 Systems and Networks Administrator Trainee – AS AFAC

2020 - 2023 | Angoulême, France

Administration of a medium-sized IT system. Ensuring operational readiness, managing the IT infrastructure, and advising the Executive Committee. Microsoft 365 and Azure administration, network deployment, and security.

📺 IT Support Technician Trainee – Orange

2018 - 2020 | Bordeaux, France

Field Technician for the Southwest Region (team of seven people, 6k+ workstations). Network cabling, VoIP, and Level 1 support.
